

TERMS AND CONDITIONS

General Information

This catalogue introduces the IDEAL LED light fittings series and replaces all previously published information.

Specifications

IDEAL's constant improvement of its products is based on updated designs and continuous research and development. Whilst great care is taken to provide the most current and up-to-date information in this catalogue publication, we reserve the right to amend and modify the characteristics of our LED lighting products without any prior notice. All specifications and illustrations in this publication shall not form part of any contract.

Dimensions

All product dimensions are specified in millimetres (mm) unless otherwise stated. These dimensions are subject to change without prior notification in view of our constant product improvement efforts.

Electronic Power Units (Drivers)

All LED light fittings supplied are for use with electronic power units (drivers) for 220- 240V/50-60Hz mains supply unless otherwise requested at the time of ordering.

The electronic power unit requires installation as close to the LED lighting fixture as possible to avoid voltage drop otherwise a significant voltage decrease will be encountered.

Our LED electric power units are fully compatible with most major dimmer manufacturers. However, we recommend a through compatibility test prior to installation of the LED light fittings.

We reserve the right to replace the electronic power units in our LED light fittings with those from an alternative and reputable international manufacturer as approved by us. In the case of such an event, this information shall be relayed to the customer upon initial enquiry.

LED Light Modules

Lumen outputs and light colours of the LED light modules used in each fitting are clearly listed in the product specifications. As Led modules are being improved continuously with higher lumen output per

watt, the lumen values indicated in this catalogue are approximate only and is valid at the time of printing. We will indicate the actual lumen value at the time of our offer. All LED light fittings are supplied with the specified LED light modules. It is not advisable for the customer to replace any LED light modules without our prior consent in writing.

We reserve the right to replace the LED light modules used in our LED light fittings with those from an alternative and reputable international manufacturer as approved by us. In the case of such an event, this information shall be relayed to the customer upon initial enquiry.

Installation

All LED light fittings are to be installed in accordance with IEC regulations and local authority requirements. The local authority should be consulted if further information is required. All personnel involved in the installation, handling, use and disposal of these products must be fully aware of the precautions that need to be taken as the full responsibility for correct installation lies with the customer.

Finishes

The standard finishes of our LED light fittings are specified in the product specifications. The fittings can also be finished in other colours; the prices and delivery times for these alternative finishes are available upon request

Trademarks and Patents

All LED lighting products are the subject of industrial design patent applications or registrations.

Warranty

All our LED lighting products are guaranteed against any manufacturing defects. The offsite warranty offered is for 5 years or 50,000 hours from the date of our delivery (refer to Philips or our other major Led component suppliers' warranty clauses on their websites). Our warranty is also limited to a one-to-one replacement of the defective fitting, which is to be supplied from our respective factories or warehouses. Please note that all handling and freight charges and custom duties shall be borne solely by the customer.
